EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Friedrich Kueffner on August 11, 2006. The examiner phoned the applicant to suggest adding the claim language that the male part of the coupling is harder than the housing as it could still be argued that if both pieces were made of glass-fiber polyethylene they could still be construed as having high hardness and slight elasticity. This places the application in condition for allowance. The application has been amended as follows:

In claim 1, line 15 of the claim, after "high hardness", insert --that is harder than the housing--.

Reasons for Allowance

2. Claim 1 is allowed.

3. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of the claims is the housing with inlet and outlet connections is of a polyethylene with slight elasticity in combination with a male part of a quick disconnect coupling is both welded to the outlet of the valve housing and is of a glass-fiber reinforced polyethylene of high hardness that is harder than the housing of polyethylene.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
